Technology partners for the next stage of your business.

Quadrate Tech Solutions is a software development and AI consultancy firm focused on digital transformation and business growth. We create tailored solutions around real operating needs - from intelligent applications and cloud infrastructure to engaging digital experiences.

01

Tailored by design

Solutions shaped around your business requirements, processes and growth priorities.

02

Built for modern scale

Cloud-ready foundations and robust applications designed for reliable operations.

OUR DIRECTION

**Accelerate access to reliable, mobile-ready technology
- across software and hardware services.**

From AI readiness to production value.

We help organizations identify practical use cases, prepare data and infrastructure, build custom models, and integrate AI into existing workflows.

- AI strategy & consulting
- Machine learning solutions
- Computer vision
- Natural language processing
- Generative AI and agents
- AI integration & implementation
- Data and MLOps services

CAPABILITY AREAS

Predictive analytics
Recommendation engines
Image & video analysis
Chatbots and assistants
Text analysis & translation
Model delivery & monitoring

Software experiences built around how people work.

CUSTOM. RESPONSIVE. SCALABLE.

From idea to reliable digital product.

We combine product thinking, interface design and full-stack engineering to deliver solutions that fit the business.

01

Custom software

Tailored systems designed around unique business requirements.

02

Web development

Modern, responsive websites and web applications that drive engagement.

03

Mobile apps

Native and cross-platform applications for iOS and Android.

Supporting capabilities: cloud infrastructure • business process automation • IT support • professional email solutions

Connect the work. Reduce the friction.

Modern platforms should simplify decisions, handoffs and everyday operations.

We integrate intelligent automation into existing software and workflows, with cloud platforms supporting scalable delivery and secure operations.

01

Assess

Evaluate infrastructure, data maturity and business processes.

02

Prioritize

Select feasible use cases aligned to business goals and value.

03

Implement

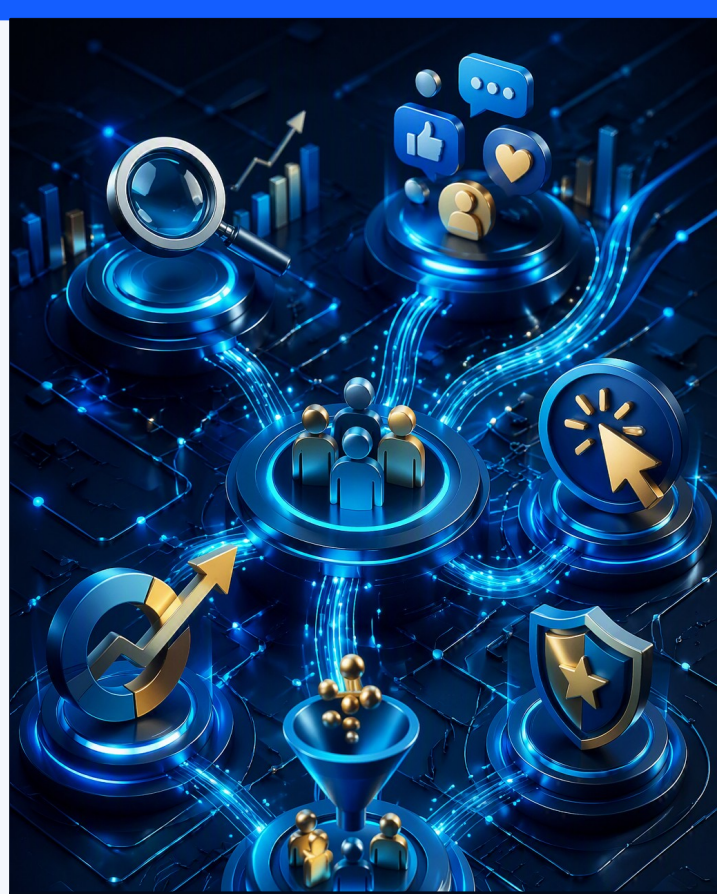

Integrate, deliver and monitor solutions in the operating environment.

Build visibility. Create engagement. Convert with purpose.

Our digital marketing services help strengthen online presence through connected strategy and focused execution.

- Search engine optimization
- Social media marketing
- Pay-per-click campaigns
- Conversion optimization
- Online reputation management

ONE CONNECTED VIEW

**Strategy, creative
and technology
working together to
support sustainable
digital growth.**

Digital services can complement web, software and AI initiatives as one coherent transformation program.

Purpose-built platforms for real operational challenges.

01

PropCare

A web-first property maintenance platform with real-time tracking, public status links and role-specific views.

02

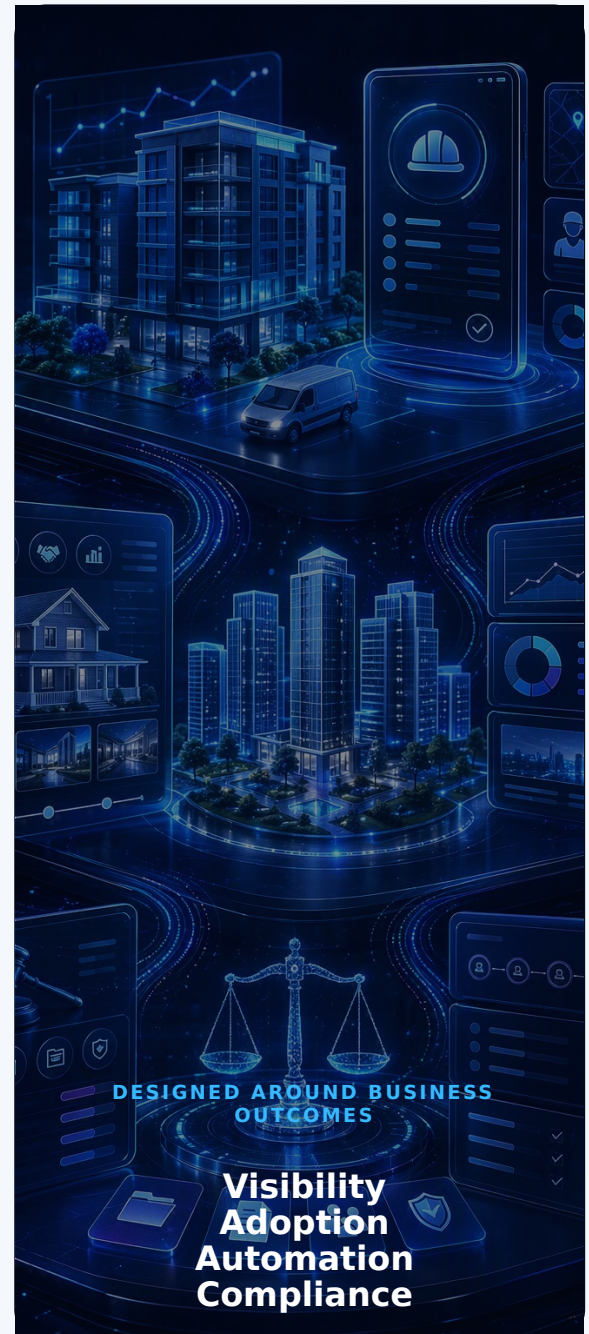

Real estate lifecycle

Microsoft 365-based workflows spanning listing intake, marketing, showings, transactions and ongoing property management.

03

Legal case workflow

Microsoft 365-based automation from client intake and collaboration through deadlines, billing and case archiving.

Each solution turns a complex workflow into a clearer, more connected digital experience.

LET'S CREATE SOMETHING AMAZING

Your next digital advantage starts here.

Start a conversation about AI integration, software development, workflow automation or digital strategy.
